South Bend 24, Indiana

Issued for Information of Producers
Who Are Not Members of Cooperative Associations

Vol. VII, No. 6

June 1963

MAY BASE PRICE \$3.74

Dairy farmers will receive a base price of \$3.74 for May 1963 deliveries of Grade A base milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order. This base price is based upon a butterfat test of 3.5 percent, and will be adjusted by a differential of 7 cents for each one tenth percent that tests vary above or below the 3.5 percent standard. This price is 7 cents higher than the base price of May 1962.

MAY EXCESS PRICE \$2.98

May 1963 deliveries of Grade A excess milk to handlers under the South Bend-LaPorte-Elkhart, Indiana, milk order will be paid for at the rate of \$2.98 per hundredweight for 3.5 percent milk and adjusted by the same differential of 7 cents as is used for base milk. These minimum prices are subject to a 4 cent per hundredweight marketing service deduction, together with the authorized hauling charge. This price is 8 cents higher than the excess price for May 1962. For comparative purposes, a uniform price of \$3.62 per hundredweight was computed, which is 5 cents less than the computed uniform price of April 1963 and 7 cents higher than for May 1962.

PRODUCER RECEIPTS

In comparing producer receipts with May 1962, we find a decrease of 2 percent in daily production. When we look at the number of producers, we find a decrease of 55 from last year. The large decrease in number of producers with almost the same amount of milk raises the daily production per herd to a new time high of 885 pounds.

SALES

Class I utilization of producer receipts was 65.6 percent compared with 63.7 percent of May 1962. Daily average sales of Class I products were up 1.5 percent over a year ago, but fall short of the preceding month by 1.7 percent. Milk in gallon paper cartons is being sold in this area, although it is being packaged elsewhere and brought in.

CLASS I PRICE

The Class I price for the June 1963 delivery period will be \$3.95 per hundredweight for 3.5 percent milk. This price was computed by adding \$0.90 per hundredweight to the basic formula price (\$3.07), minus the 2 cent supply-demand adjustment. The supply-demand adjustment for the July 1963 delivery period will be a minus 2 cents.
